

Job Title: Full Stack Developer - Front End Focus

Company: Winmore

Position Type: Full-time

Experience Level: 3-6 years of experience.

About Winmore

Winmore is the go-to solution for forwarders, brokers, and carrier professionals seeking to streamline tender management and RFQ workflows with data-driven insights. Our platform leverages artificial intelligence to revolutionize the pricing process, empowering users to optimize bids, track performance, and negotiate contracts with confidence.

Position Overview

As a Full Stack Developer with 3-6 years of experience, specializing in both front-end and back-end development, you'll play a pivotal role in constructing scalable and high-performance web applications. Your mastery of React for front-end development and Node.js for backend services, combined with a steadfast commitment to code quality and maintainability, will be instrumental in driving the success of our projects.

Expanded Role Overview

- Proficient in crafting scalable, high-performance web applications utilizing React for front-end development and Node.js for backend services. Strong command of ES6 for backend services underscores your commitment to code quality and maintainability.
- Experienced in employing React libraries such as Express.js, Redux, Chart JS, ODATA, etc., enhancing the functionality and efficiency of web applications.
- Familiarity with MERN stack or similar frameworks, showcasing your versatility in adapting to different technology stacks.
- Good to have experience in MPP languages like GOLANG, Scala is an advantage.
- Skilled in designing and implementing robust RESTful APIs using Node.js, optimizing them for superior performance and scalability.
- Possessing experience in developing cross-platform mobile applications using React Native, ensuring seamless user experiences across iOS and Android devices is considered advantageous.
- Proficient in integrating front-end applications with various AWS services to construct serverless architectures, leveraging tools like Lambda, Step Functions, and AWS Batch to create highly scalable and cost-effective solutions.
- Experienced in implementing continuous integration/continuous deployment (CI/CD) pipelines using AWS CodeBuild, CodeDeploy, and CodePipeline, streamlining the software delivery process.
- Knowledgeable in configuring and managing AWS networking and security services such as Virtual Private Cloud (VPC), Security Groups, and Identity and Access Management (IAM) to ensure secure and scalable deployments.

Enhanced Database Proficiency

- Expertise in schema design and query optimization for SQL (PostgreSQL/MySQL) and NoSQL databases (DynamoDB/MongoDB), ensuring efficient data storage and retrieval. Exposure to triggers, functions, and procedures.
- Exposure to nodal databases like DynamoDB, MongoDB, Graph DB, Redis, Cassandra/Redshift.
- Experience in event-driven architecture and utilization of SQS, SNS, etc.
- Proficiency in leveraging AWS DynamoDB for building highly scalable, low-latency applications, with a focus on optimizing read/write performance and cost.

Further Technical Exposure

- Proficient in utilizing AWS Step Functions to orchestrate micro-services, batch processing, and workflow automation, thereby enhancing application reliability and scalability.
- Experienced with AWS Glue for data preparation and loading, facilitating efficient data warehousing solutions.
- Skilled in utilizing AWS SNS and SQS for constructing loosely coupled, scalable, and reliable microservices architectures, ensuring effective communication between different application components.
- Familiarity with serverless application development (AWS Lambda) and best practices, including security, monitoring, and logging with Datadog, Session Stack.

Work Environment

- Ability to thrive in a collaborative, agile development environment, embracing iterative development practices and open to adopting new technologies and methodologies.
- Strong problem-solving skills and the ability to work under tight deadlines, delivering high-quality software solutions that meet business requirements.

At Winmore, we are committed to fostering an inclusive and diverse workplace where all employees feel valued and empowered to succeed. If you are passionate about technology and thrive in a collaborative environment, we encourage you to apply for the Implementation Analyst position and join our team today.

Please note Winmore is an equal opportunity employer. All applicants will be considered for employment without attention to race, color, religion, sex, sexual orientation, gender identity, national origin, veteran, or disability status.
